End-to-end tests Developer

Enterprise Social Network

Context:

Linagora is a French leading company in Open Source Software. We have offices in France, Belgium, US, Canada, Vietnam and Tunisia. We develop REAL free and open source software to help public administrations and enterprises to boost their performance and remain independent from vendors lock-in.

Job description:

In order to improve the quality of our products, our team wants to automate end-to-end testing of the GUI (Graphical User Interface) by using Selenium and WebDriver. Developments based on Angular.js, Selenium will be coupled to Protractor. In this context, we are looking for an 'End-to-end tests Developer' to initiate this automation project.

Your tasks:

- You'll do the study and development of automated test tools including the following activities:
  - Examine the state of the art among the open source automation products;
  - Develop test cases, according to the Cucumber formalism (BDD) or equivalent;
  - Write the code to run automated tests;
  - Ensure compatibility of these tests with all target browsers on cloud services;
  - Industrialize these tests on our continuous integration server (Jenkins).
- You'll be in direct contact with all the team in an open and international environment.

Your skills:

- You appreciate technology and exchanges with developers (Agile approach/Scrum);
- You are excited to participate in a free solution development and compete with other enterprise network solutions;
- You have a real sense of rigor, a taste for research and experimentation;
- You propose ideas/advice/suggestions;
- You are autonomous while staying connected to the reality of the business;
- A good knowledge of Linux, a good crop of software programming and development in early experiments in different languages is a plus;
- A good English level is required, as the team evolves in an international context.

Your benefits:

- Nice atmosphere in a pleasant office in Hanoi;
- Encouraged personal projects (conferences, entertainment communities…);
- Mentored and supported by experienced developers and testers.
