Full Stack JavaScript Developer

Context::

Linagora is a French leading company in open source software. We have offices in France, Belgium, US, Canada, Vietnam and Tunisia. We develop REAL free and open source software to help public administrations and enterprises to boost their performance and remain independent from vendors lock-in.

Job description:

We are looking for a Full Stack JavaScript developer to develop our new software: OpenPaaS. Do you love web technologies? You can't sleep without having re-read your JavaScript code at least once? You dream of being paid to develop real open source software? Let's meet up!

OpenPaaS is an enterprise social platform based AngularJS, Bootstrap, NodeJS, MongoDB, ElasticSearch, Socket.io, Redis, WebRTC and many more. Our work is organized according to Scrum method: splitting up functionality into user stories, sprint planning, sprint reviews and software design meetings. We use continuous integration, pull requests and code reviews.

You should be a generalist who likes to build scalable real time systems. You will take part in application design and choose the technologies used for implementation. Your suggestions will be important. Code and tests are both important.

Profile:

- Strong knowledge of JavaScript.
- Experience with: NoSQL, AngularJS, NodeJS, ExpressJS, graph databases, Ionic, Cordova.
- Version control systems, especially git.
- Awareness of latest technologies and ability to know when to use them (instead of using a proven solution).
- Good English level.
- UI and UX design experience.

Why should you join us?

- Work in a friendly and professional atmosphere.
- Experienced developers will always be there to help you
- Personal projects are encouraged.
- Get paid for open source work.
- Attractive salary based on experience.

Working place: Hanoi
